Yukon	-3.4	9.8	-0.1	9.6	-11.7	8.9	-0.7	12.7
Northwest Territories	7.8	0.8	-1.5	-0.8	8.7	-1.2	-0.3	-8.2

Notes:

- Calculations of productivity growth rates are based on numbers rounded to one decimal.
- This release incorporates an update to 2017 data on provincial and territorial labour productivity and related variables in the business sector by industry. These data are consistent with those incorporated in the provincial and territorial gross domestic product by industry for 2017, released on May 2, 2018. No revisions have been made to data for previous years. Revised estimates of hours worked and labour productivity in the provinces and territories for 2015 to 2017 will be published in February 2019.
- Readers should be aware that the percentage figure changes for Nunavut can vary significantly due to the relatively small numbers. Taken over longer periods of time, the resulting changes would likely be more reflective of the actual changes in either labour productivity or hours worked.
