Data may not add to totals as a result of rounding.

Note to Readers:

The Building Permits Survey covers 2,400 municipalities representing 95% of the population. It provides an early indication of building activity. The communities representing the other 5% of the population are very small and their levels of building activity have little impact on the total. The value of planned construction activities shown in this release excludes engineering projects (e.g., waterworks, sewers or culverts) and land. The data is collected from Municipal offices.
